

movo.ch

Mobile voting system

<https://movo.ch>

The screenshot shows the web interface for movo.ch. At the top left is the logo 'movo.ch'. To the right of the logo is a navigation bar with 'About | Login'. Below this is a yellow banner with the text 'Welcome to movo.ch...'. Underneath is a form area with the instruction 'Please enter a valid token and click submit:'. Inside the form is a text input field labeled 'Token' and a red 'Submit' button.

What is movo.ch?

movo.ch is a web application which allows live voting during a presence event using web enabled end user devices. As an author, you have the option of compiling individual questions as question sets in advance. The survey results are available immediately after the survey.

Functionalities

- Generation and management of question sets
- Presenting questions, answers, results and solutions
- Anonymous voting without login
- Voting process controllable by the author

Benefits

- Platform independent voting with web enabled device
- Results are shown live with differentiations
- Fast determination of knowledge for lecturers and students
- Simple operation
- Anonymity increases participation

When can I use movo.ch?

On the one hand, movo.ch can be used to question taught knowledge during an event. This permits lecturers and students a precise analysis of knowledge levels. Movo.ch can also be used to generate surveys, e.g. to obtain participant feedback.

Disadvantages

- Question types are momentarily reduced to single choice and multiple choice
- Results cannot be exported

How and who?

Movo.ch can be used by all persons with a valid SWITCHaai account for university purposes.

All persons with a web enabled end user device can participate in the survey itself.
